

School Field Trips at The NASTAR Center

The NASTAR Center is a non-governmental, world-class facility for aviation and space flight training and research. Bring your students to The NASTAR Center, where they will see:

- The world's most advanced high-performance centrifuge, the ATFS-400 PHOENIX
- Altitude chamber
- Aircraft simulators
- Ejection Seat Simulator

If you would prefer to do a “fact finding” tour to see what The NASTAR Center has to offer before you schedule your field trip, individual Teacher Orientation Tours can be arranged — just give us a call to set one up
(215) 355-9100 X 1512.

Field trip content has been organized to reinforce PA academic standards for science, technology, engineering, and career education.

Please note: Students will not be permitted to “ride” or try out any of the training equipment.

There are a limited number of tour dates available. To schedule your class, contact Greg Kennedy at gkennedy@NASTARCenter.com or 215-355-9100 X 1512.
